# PRODUCT ANNOUNCEMENT

**New addition to the GAFF Polyurethane Range****Part Number****11178**

GAFF® cab mounts are polyurethane-based mounting components used to isolate and support the truck cab, replacing traditional rubber mounts.

They're part of GAFF's polyurethane undercarriage product line designed for heavy-duty commercial trucks.

Polyurethane mounts are engineered to provide greater durability, vibration absorption, and resistance to environmental damage than conventional rubber components.

GAFF has been manufacturing these components for over 35 years.

Suit some Western Star X-Series & Freightliner Cascadia
