SUPERSESSION BULLETIN

Changes to the STEMCO Wheel Bearing Kit Range

As part of our ongoing effort to standardise our wheel bearing kit range, we have implemented a number of supersessions from existing part numbers to new part numbers.

Please note: there are no changes to product design, specifications, or performance - only the part numbers have been updated.

We ask that you update your internal systems and records to reflect these supersessions to ensure seamless ordering and inventory management.

TYPE	MAKE	MODELS	OLD KIT NUMBER		NEW KIT NUMBER
R	DANA DETROIT MERITOR	COMMON TANDEM AND TRI AXLE APPLICATIONS	KIT-106STM	Supersede to	KIT-121STM
TN TM HN	COMMON STEFEN DEXTER HENDRICKSON	TAPERED SPINDLE SELF STEER HXL2, HXL5	KIT-110STM KIT-107STM	Supersede to	KIT-123STM KIT-133STM
